

Assembly instructions for a Napier Massage Table

Carefully unpack the bed and lay it face down on the floor making sure there are no sharp objects that could damage the vinyl. It is also not advisable to drag or slide the bed across the floor as it may damage the vinyl.

Stand the legs up on one end to a 45 degree angle and connect the bolts that support the platform that goes under the bed. Do not tighten them fully at this time.

Next left the legs up on the other end of the bed, lift the other end of the platform and connect then insert the bolts for this end, still leaving them slightly loose.

Attached the 4 brackets that go from the legs to the bed frame, again leaving the bolts slightly loose as you may need to move the leg slightly to line the bolts up

Once all the bolts are in, tighten them fully

Take the silver pole, remove the nut and bolt from one end, slide it through the bracket with a hole in it and connect it to the back of the head rest. Repeat the process on the other side.

Carefully turn the bed over and insert the face pillow if required.

If you have any questions or difficulties, please contact the place of purchase.
